

ROAD BANS – EFFECTIVE 21 MARCH 2019

To limit the amount of damage to M.D. roads during the period of spring thaw, the following weight restrictions and timelines have been imposed by the M.D.'s Road Ban Committee.

As operators, you must make yourself aware of the load limits associated with the roads you drive. As the cost of road repairs is a principal concern to all ratepayers in our municipality, we ask that you assist us in minimizing the amount of damage.

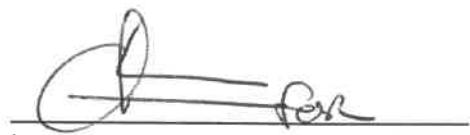

The Municipal District of Bonnyville No. 87, being the road authority, may at its sole discretion ban any and all roads at any given time due to road deterioration.

We realize that some of our roads will deteriorate quicker than others due to many factors including high traffic flow, heavy loads, weather conditions, etc. We remind you that a discretionary road ban exists all year round on roads considered sensitive areas and may be posted with a specific weight restriction.

Effective 21 March 2019 Heavy traffic will be limited to 75 per cent on all M.D. oiled and gravel roads, with the exception of the La Corey North Resource Road. Roads will be regularly inspected and changes to the road ban will be made according to road conditions.

Permission to exceed the ban will be reviewed by the municipality on a case by case basis for specific trips.

Specific approvals can be obtained by contacting the Municipal District of Bonnyville's Transportation and Utilities Department at 780-812-5000
